

# DR. PAMELA CLARKE

## President & CEO

*"You should always do the right thing, not just do the thing right."*

NCHC is so proud to be celebrating 39 years of service to the community. We were incorporated on October 2, 1986 and began ambulatory service in 1987. Now, we have become the largest provider of comprehensive primary care service for the uninsured and medically underserved populations in the country's most densely populated cities. NCHC is a health care resource for the prevention and amelioration of health disparities in Essex County.

With the help and support of each of you, including our community partners, we are improving the lives of 51,444 patients through 162,541 visits. We have served over 37,020 patients through telehealth since 2020. HRSA's Department of Health and Human Services (HHS) awarded NCHC the Advancing Health Information Technology for Quality Award in New Jersey.

Last year's fundraising gala focused on health and education in our community. We raised over \$51,000!
